Dear colleagues!

The task of selection of technology, manufacturer and supplier of server equipment was set to our company as part of internal project of designing and implementing of automated ERP-class management system on the territory of the company.

CCA specialists have provided comprehensive support at the right level of consulting and feasibility study of architectural solutions in the process of auditing existing resources and the development of the proposed architecture solutions of the Company.

Also CCA specialists have confirmed their high status in knowledge of the HPE equipment and selection of appropriate solutions in the process of designing new server capacity. In particular, CCA made the best offer in terms of price-quality complex delivery of the equipment intended.
